MISSIONS

Mission 3027-01: Welcome to Aber-whatever.
Aberystwyth, Timbuktu Theater, Lyran Commonwealth
March 29, 3027
Pilot Skill: 3-5

Okay Boys, listen up! After our big dust-up with the Dragoons last year, we're taking a bit of a break. I know it feels like forever we've been cooped up in our cozy little dropships, but it's only been, what, six months? Things were getting a bit hot on the Combine border, so I decided a change of scenery was in order. Good thing, too, as it seems the Elsies are having trouble with some bandits out here by their Periphery border. Their Intel says they'll hit Aber-. Abeswy-. **This** planet next, and they want us to stop them, and put an end to the raids. For once, it looks like their Intel guys had it right!

A few hours ago, early warning radar spotted an unknown dropship coming in fast. From the looks of things, they're heading for a remote mountain range, which is mostly empty, but does have some scattered mines in operation. Our employers want us to head out there pronto, and stop the bad guys from messing up whatever counts as industry around these parts.

Unfortunately, the bandits landed in the mountains, and in the midst of a winter storm. Between the weather and the local mineral deposits, we're having trouble pinpointing them, so it will be up to you to track them down. Head over to the mining trail I've marked on your map as grid point Alpha, and start looking around. If you can, intercept them before they can get too close to the mines located over here at grid point Gamma.

Map: This mission takes place in the foothills of a mountain range. Any hilly/mountainous maps will do. The less water on those maps the better.

Recommended Maps:
1: Rolling Hills 2
2: Rolling Hills 3
3: Foothills 2
4: Rolling Hills 1

Setup: The bottom of the map is the players' "Home Edge". Before the game begins, the heroes enter through that edge of the map, and may spend two turns worth of movement positioning themselves on the map before play begins. After that, randomly select the edge of one map sheet as the pirate entry point. That edge cannot be a part of the players' home edge. The bad guys enter through that map edge.

Special Rules

Mechin' in a winter wonderland: Play starts with "Moderate Snowfall" weather conditions (See Tactical Operations, p60). All passable map hexes count as "Thin Snow" terrain (See Tactical Operations, p52).

Um, Boss? Where are we?: The Pirates begin the game lost, but will regain their bearings. At the start of the game, the heroes secretly write down which map sheet edge (there are 8 possibilities - it is based on map sheet, not the overall map) is the pirates' goal. During the end phase of turn 8, the PCs reveal the goal map sheet edge. Starting on turn 9, any pirates that leave the map off of that map sheet edge are counted as having succeeded at bypassing the heroes.

They are not paying me enough for this!: Starting on turn 10, the pirates are under 'forced withdrawal' rules. If a pirate 'mech becomes crippled, it must attempt to retreat off of the nearest board edge. Pirates that escape off of an edge that is not their goal edge are not counted against the players' victory condition, but do count against the PC's bonus objective.

Bored Now: If the Pirates haven't escaped off by turn 14 then they will immediately retreat off the nearest board edge. If it is *not* the goal edge then they don't count against the players' victory condition.

No Pirate 'mechs escape (Bonus Objective)	+100,000	+100,000	+100,000
More than 1 Pirate 'mechs escape off their target edge (Failure)	150,000	100,000	50,000

Award (XP)	Pilot Survived	Pilot Killed
No more than one pirate 'mech escapes off their target edge (Success)	15	5

Award (XP)	Pilot Survived	Pilot Killed
More than 1 Pirate 'mechs escape off their target edge (Failure)	8	3
Opposing 'Mech/Combat Vehicle destroyed by party	+1	+1

Additional Rewards

A Moment of Serenity: ❑❑
Look, I'm not saying I want to build a summer home here or anything, but the snow is actually quite lovely.

For the remainder of the turn, you may ignore any terrain or environmental condition. This includes conditions like “Moderate Snowfall” or “Night”. It does not allow you to ignore regular terrain features like woods or water. (Usable twice)

Mission: 3027-01 Debrief
Welcome to Aber-whatever.
Aberystwyth, Timbuktu Theater, Lyran Commonwealth
March 29, 3027

It takes you a while to march back out of the mountains to the rendezvous site. By the time you do, Sarge is already waiting for you with more great news:

“Looks like there were more pirates stumbling around in that snow than we thought. The good news is that they were just as lost and blind as we were, so they didn’t cause too much damage. The Elsies aren’t blaming us for not intercepting attacks that we didn’t know about. The bad news is that there are still a bunch of bad guys out there wandering around the mountains.

“What’s worse, it seems that these guys are way better equipped than anybody expected, and our employers want to know why. Somebody is going to have to go track down their home base to find out what’s going on, and that somebody will probably be us. The locals think the best, meaning fastest, way to do that is to pull navigational data from their dropship, which probably can’t launch while the storm is blowing. Any volunteers?”

Mission: 3027-01 Debrief
Welcome to Aber-whatever.
Aberystwyth, Timbuktu Theater, Lyran Commonwealth
March 29, 3027

It takes you a while to march back out of the mountains to the rendezvous site. By the time you do, Sarge is already waiting for you with more great news:

“Looks like there were more pirates stumbling around in that snow than we thought. The good news is that they were just as lost and blind as we were, so they didn’t cause too much damage. The Elsies aren’t blaming us for not intercepting attacks that we didn’t know about. The bad news is that there are still a bunch of bad guys out there wandering around the mountains.

“What’s worse, it seems that these guys are way better equipped than anybody expected, and our employers want to know why. Somebody is going to have to go track down their home base to find out what’s going on, and that somebody will probably be us. The locals think the best, meaning fastest, way to do that is to pull navigational data from their dropship, which probably can’t launch while the storm is blowing. Any volunteers?”
