## MISSIONS

**Mission 3028-04: Hold the Line, Were river Bridge Reloaded**  
**Hashi Bridge, Were River, Shaula**  
**September 11, 3028**  
**Pilot Skill: 3-4**

Okay boys, listen up! As we were reporting success against the Snake artillery, we lost contact with LAF command. Since our orders were to radio in for our next assignment, we're a little bit on our own until we can re-establish contact. The first step, of course, was making our ways back across the Were river and see if we can't regroup with Major Reinschadt. It's likely the Dracs will try to stop us, but since have we let a few Combine 'mechs stop us?

To make matters more interesting, it looks like the snakes are making a move on the Hashi bridge that we went to all that trouble to secure. Now we could technically cross the river in 'mechs without a bridge, but the Were is wide and moves fast. It'd be dangerous to even try. And forget all of the tanks and other heavy stuff the Lyrans are lugging around. Since we don't even know where Lyran command is right now, we'd better make sure that they can get across that bridge - regardless of what side of it they're currently on.

So that's it! Get to that bridge. Keep the Kuritans from destroying it. If it's any consolation, their ridiculous Kuritan sense of honor means they might forget their objective for long enough for you to deal with them. Oh, one more thing - if you can capture one, that'd be great. They've gotta already be on the wrong side of the river, which says there are some hiding out in our backfield. I suspect that LAF command would very much like to ask one of their pilots real nice like how many more are out there, and where they are.

**Map:** This should be the same map setup used for mission 3028-02, if possible. Use only the bottom halves of the top two maps so that the entire play area is 1.5 maps tall by 2 maps wide.

There are 4 bunkers around the bridge, 2 on each side adjacent to the end of the bridge (Coast #1, hexes 1103, 1203 and 1304). These bunkers are heavy buildings with a CF of 60.

### Recommended Maps:

- 1: Archipelago1
- 2: Coast 2
- 3: coast 1
- 4: Rolling Hills 2

**Setup:** The heroes will enter from the top of the left map on the bridge on the Archipelago map. The OPFOR will enter from the bottom edge of the bottom right map.

### Special Rules

**Didn't we capture this bridge already?:** If any player has the "A bridge to where" reward from Mission 3028-02, they may cross it off for the bunkers on the map to begin occupied by Lyran forces. The PCs will have four Platoons of Heavy Jump Infantry, one per bunker. Additionally, these troops have searchlights (see below)

**They just don't make 'em like they used to!:** The Bridge is a hardened structure with at least 60 CF. The total strength is listed in each BV band. The bridge is considered "Damaged" if a single hex is destroyed, and "Destroyed" if more than one hex is.

**I can't see a thing!:** This game takes place at night. Attacks are at +2 to hit. However, any unit may, during the "Declare fire" phase declare that they are turning their searchlight on, and they may declare a target within 30 hexes. This eliminates the +2 penalty for both the mech with the searchlight and his target. Unlit infantry do not count as being "In the open" for damage purposes.

**Rules of Engagement (Do not share with the PCs):** The Kuritans are more interested in honorable combat than attacking a poor, defenseless bridge. No Kuritan pilot will target the bridge if they have line of sight to a PC that is closer to them than the bridge or that has targeted any of the Kuritan 'mechs with its searchlight. Starting on turn five, or if at least 40% of their 'mechs have been disabled or destroyed, the Kuritan commanders will successfully get them under control, and they may target the bridge normally. The Kuritans are under *forced withdrawal* rules.

**Mission Objectives: Primary Objective:** Prevent the enemy from destroying the bridge. The bridge is considered destroyed if two or more hexes are destroyed, or severely damaged if a single hex is destroyed. If the party prevents the bride from being severely damaged then they'll get the additional reward "Supplies" below.

**Bonus Objective:** Capture a Combine pilot by destroying or immobilizing his 'mech without killing him.

Award (C-Bills)	Mech Survived	Mech Severely Damaged	Mech Destroyed
Prevent destruction of the bridge (Mission Successful)	350,000	250,000	100,000
Capture a Combine pilot (Bonus Objective)	+100,000	+100,000	+100,000
2+ Hexes of bridge Destroyed (Mission Failure)	150,000	100,000	50,000

Award (XP)	Pilot Survived	Pilot Killed
Prevent destruction of the bridge (Mission Successful)	15	5
2+ Hexes of bridge Destroyed (Mission Failure)	8	3
Opposing 'Mech/Combat Vehicle destroyed by party (each)	+1	+1

**Additional Rewards**

**Supplies!**

Because you kept the critical Hashi bridge open, you are able to get a quick field repair mid-mission. Cross off this reward to either get a single use of the Field Repair Kit PSA (5 points of armor repair to a single location per weight class) or fill a single ton of ammo that hasn't been destroyed.

**Mission: 3028-04 Debrief**  
**Hold the Line, Were river Bridge Reloaded**  
**Hashi Bridge, Were River, Shaula**  
**September 11, 3028**

Well done boys! We prevented the Dracs from crossing the River in force and from getting into the rear. Our ride off this hunk of worthless rock is secure for now. Based upon the information collected from the damaged enemy 'mechs, Lyrans Intelligence thinks they have an approximate location from where the Snakes came from. We will know more in the next day or so. And as a thank you for saving their bacon, the Lyrans are moving us up in the refit line, so get your 'mechs over to the techs and get some hot grub, a shower, and some rack time. I suspect we are going to need the rest just as soon as the techs are done with our rides.

**September 11, 3028**

Well done boys! We prevented the Dracs from crossing the River in force and from getting into the rear. Our ride off this hunk of worthless rock is secure for now. Based upon the information collected from the damaged enemy 'mechs, Lyrans Intelligence thinks they have an approximate location from where the Snakes came from. We will know more in the next day or so. And as a thank you for saving their bacon, the Lyrans are moving us up in the refit line, so get your 'mechs over to the techs and get some hot grub, a shower, and some rack time. I suspect we are going to need the rest just as soon as the techs are done with our rides.
